Just call me baby

Tell me baby, who is to blame?

Is this driving you insane?

I can help you play this game

I can help you fix this thang

When it pours it rains

You say your boss is yellin'

But your email just won't send....

You've got something baby,

That I know that I can mend!

Better go back to using a pen

You call up the offshore tech support

But their words you can't understand!

Just call me baby

Don't let your trouble get out of hand

It's not just the accent it's the

So-called words that they always use.

I think they're guilty of

Acronym abuse.

The LAN is about to hit the fan

I want to throw it all in the can!

Sometimes I hate being the company IT man. (Jbobbe)

CDROM, SDRAM, RTFM, PEBKAC

USB, MCA, DNS, IP, MIME, ISP, PACKET

FIFO WYSIWIG, GIGO, SATA, WIFI, IT, LAN

WAN, TWAIN, BYTE,

VLAN, OCWDIDK, Browser, PING SNAFU

---

TELE, LPAR, BUG, CICS, GLITCH  
“ANY” KEY

You got a PING SNAFU  
And a BUG is makin’ you GLITCH?

---

how about my interests rates I  
can't complain..it money in my pocket for  
unseen things..I'm the bank that everyone  
has..call me the one you love I'm bank of  
america cuz (state007)
